Virtual Plastic is the first release from **Unalome Records** head **Omnom**. After a long time being a DJ, experimenting with a lot of analog and modular synthesizers, and doing weird stuff with sampling and recording there are finally some tracks to be given out to the world. All of them are already dance floor-approved and while you're reading this new things in the making. Artwork is done by **Omnom** himself while the mastering is done by Felix Greenlees, better known as **Terrafractyl** from Australia.
